

**Dyna Shock System**

Our identification process attributes an individual serial number to each new or repaired device, and so enable a precise traceability. Our data base allows access to all sold shock absorbers, and to have the details about manufacturing/tests, and commercial information.

Globally, our serial number is composed of: D2S-month/year-serial number, which is the nth device of the month.

Example: D2S-07/18-145 = is the 145<sup>th</sup> device manufactured in July 2018.

Our products are 100% French origin.
